

# Science and Environment Council Watershed Audio Tour

## Discover Our Watersheds

A watershed is an area of land over which rain water flows before collecting in a waterbody, such as a stream, lake or bay. We all live and work in a watershed, and how we treat it affects the quality of our waterbodies — and our quality of life.

**Dial (941) 926-6813**

Our audio tour offers a menu of 32 engaging topics with interesting facts and things you can do to help protect our watersheds. A menu of tour stops appears on the back of this card.
