

ELECTRIC TOOLS PROTECT AIR & WATER

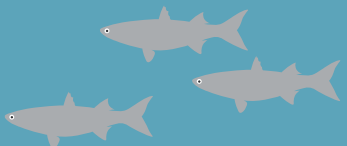

Advances in electric tools make them powerful, effective replacements of gas-powered tools.

- **Save money** on new equipment that eliminates the headaches of costly maintenance and repairs of carburetors and engines.
- **Give gas a pass** and avoid the hassles of buying, storing, and using gasoline, additives, and stabilizers.
- **Keep the peace** in your neighborhood with quieter machines.
- **Protect health** by eliminating noxious fumes and high decibel noise.

GAS TOOLS POLLUTE AIR & WATER

Gas-powered lawn tools aren't just stinky and loud, their nitrogen emissions react in the atmosphere and fall down as nitrogen pollution in dust and rain.

Air pollution becomes water pollution

Excess nitrogen fuels harmful algal blooms, which kill aquatic life and impact human health and quality of life.
